

Futura A mini revolution

The most comprehensive system on the market

Simply put, in the point-of-use sector the Futura range is a revolution / revelation in a high specification, highly compact, stainless steel package. The Futura range dispenses cold, sparkling and ambient water and comes complete with cup-holder. Ideal for offices and with its elegant lines blends smoothly into any setting.

A practically maintenance-free system

The Futura is really quick to install. Zerica's unique patented cooling system has no tank or float so it has none of the maintenance issues traditionally connected with these features. The sealed stainless steel refrigeration chamber is welded together using silver, a material well known for its antibacterial properties. It also uses the exclusive Silver Turbo Clean system which generates a water vortex on the internal walls whenever water is dispensed so preventing biofilm formation.

Futura is the ideal choice if you're looking for excellent quality, compactness and design.

Simply the smallest cooler on the market

One of the many records broken by this range is clearly its size: only 25 centimetres wide and 17.5 deep.

In such a compact space, no other water-cooler system is able to offer a refrigeration unit, water filter, professional carbonator with CO₂ canister (Mod. 90) plus plastic cup dispenser

Ergonomically designed for all uses

At 106 cm from the ground, the water outlet is positioned at an ergonomically ideal average height. This cooler can even be wall mounted to facilitate floor cleaning. The 29 cm high dispensing compartment can accommodate both glasses and carafes.

Even in particularly hot environments

Zerica's exclusive Sahara Clima system, used on all of these coolers, allows them to operate perfectly even with external temperatures of up to 43°C. The ideal choice for hotter climates.

STANDARD ACCESSORIES

- microprocessor with LED alarm to monitor unit's efficiency (dispensing times and months of operation)
- stainless steel outer casing
- professional stainless steel carbonator with CO₂ regulator (Mod. 90)
- head for filter cartridge
- filter cartridge
- CO₂ reducer for single-use bottle (Mod. 90)
- cup-holder

OPTIONAL ACCESSORIES

- Single-use CO₂ bottle (Mod. 90)
- kit for connection to a cooler bottle to be independent of mains water
