WATER PURIFIERS

Ready to be used with:
Coolers, Vending, Catering sector, Ice, Laboratories or Domestic.

The contents of the carbon filters is made in the USA by CALGON

PuricomEurope®
REVERSE OSMOSIS PURE WATER

Ft line >fountains

The FT-line water treatment system designed for cooling fountains can be installed inside or outside the appliance. Racks, connectors, and accessories are included for a quick installation.
Improve the taste of your water, and save money and time using our FT-line filters with common supporting cap for all cartridges. It is quick, hygienic, and easy to maintain.

FT-line has got different kind of water treatments: filtration, active carbon, active carbon with silver, or ultrafiltration membrane when a bacteriological protection is needed.

Suitable for

Cooling fountains FT-line 83 / FT-line 88 / FT-line Ve
Fridges with cool water faucet FT-line 83 / FT-line 88

FT line

Our FT-line water treatment systems are the perfect partner for your vending business. A complete range of FT-line products will meet all your needs.
Professional expresso and coffee machines (FT-line Ve), soft drink vending machines (FT-line 82 / FT-line 88), steam oven (FT-line 85) or laboratories (FT-line 89) and more.

FT-line products will improve the taste of your coffee, food, soft drinks, protect your machines and save money in maintenance. FT-line produts have got a common supporting cap for all cartridges. It is easy and quick to replace it. The 1/4 turn quick connection system gets the maximum hygiene.

Suitable for

Expresso machines FT-line Ve
Coffee machines FT-line Ve
Soft drink vending machines FT-line 82 / FT-line 88
Coolers FT-line 88
Steam ovens FT-line 85
Appliances for making ice FT-line 85 / FT-line 88

FT line >residential

Improvements in our home are usual in the modern way of life. Our useful FT-line systems will prevent you from carrying heavy water bottles.
Drinking ultrafiltrated and dechlorinated water, improving the taste of your coffee or tee, and cooking without chlorine are just some of the advantages you will get.

For example, the FT-line 3 system has been designed thinking of a residential use. It guarantees the maximum quality of your water, its ultrafiltration membrane protects the water from viruses and bacteria.

Suitable for

Water for your home FT-line 3 / FT-line 2 / FT-line 1
Reverse osmosis Water pH regulation FT-line 87
Protection for your reverse osmosis appliances FT-line 82
Bacteriological protection for your reverse osmosis appliances FT-line 91
Ultra-pure water production FT-line 89

Ft line technical details

Ft line 1

Ref: 795400
FT GAC activate carbon filter assembly kit Sink Tap.
Suitable for domestic use and vending.

Equipment composition:
1 FT-88 silver carbon filter,
1 FT cap,
1 wall bracket,
1 sink tap model Oslo,
1 valve 3/8,
1 wall tap,
1 tube 3/8 set.

Ft line 2

Ref: 795401
Set of two FT filters.
5µ polypropylene and GAC.
Suitable for domestic use and catering sector.

Equipment composition:
1 FT-82 filter 5µ,
1 FT-88 silver carbon filter,
2 FT caps,
1 wall bracket,
1 sink tap model Oslo,
1 valve 3/8,
1 wall tap,
1 tube 3/8 set.

Ft line Ve

Ref: 795403
Set of two FT filters.
5µ polypropylene and act. carbon with silicopoliph.
Suitable for catering and vending sectors.

Equipment composition:
1 FT-82 filter 5µ,
1 silver carbon FT filter and silicopoliphosphate FT-90,
2 quick 3/8 connections.

Ft line 3

Ref: 795402
Set of two filters (activate carbon and 5µ polypropylene) and ultrafiltration membrane.
Suitable for domestic use.

Equipment composition:
1 FT-82 filter 5µ,
1 FT-88 silver carbon filter,
1 FT-91 ultrafiltration filter,
3 FT caps,
1 wall bracket,
1 sink tap model Oslo,
1 valve 3/8,
1 wall tap,
1 tube 3/8 set.

Ft line basic

FT-line 82 Ref: 795500
FT filter in 5µ polypropylene.
Suitable for domestic use or prefilter in domestic osmosis.
Equipment composition:
1 FT-82 filter 5µ,
1 FT cap 1 bracket,
2 quick 3/8 connections.

FT-line 83 Ref: 795501
FT filter with GAC activated carbon.
Suitable for domestic use and catering sector.
Equipment composition:
1 FT-83 filter, 1 FT cap,
1 bracket, 1 quick 3/8 connection.

FT-line 85
Ref: 795503
FT cationic resin filter for descalcification.
Suitable for vending and catering sectors to protec hot water appliances.
Equipment composition:
1 FT-85 cationic resin filter,
1 FT cap,
1 bracket,
2 quick 3/8 connections.

FT-line 87
Ref: 795502
FT filter for regulating pH and remineralising acid water.
Suitable for regulating pH in acid water and reverse osmosis appliances.
Equipment composition:
1 FT-87 remineralization filter,
1 FT cap,
1 holding bracket,
2 quick 3/8 connections.

FT-line 88
Ref: 795504
FT GAC activate carbon filter with silver. It prevents the growth of the contamintation in.
Suitable for domesitc use and catering sector.
Equipment composition:
1 FT-88 silver GAC filter,
1 FT cap,
1 bracket,
2 quick 3/8 connections.

FT-line 89
Ref: 795505
FT mixed bed resin filter for demineralisation.
Suitable for laboratories when small quantities of highly-purified demineralised water is required.
Equipment composition:
1 FT-89 mixed bed resin filter,
1 FT cap,
1 bracket,
2 quick 3/8 connections.

FT-line 90
Ref: 795506
FT GAC activate carbon filter with silver and silicoph.
Suitable for use in hotels, vending and cool fountain sec.
It removes the chlorine and protects against incrustations.
Equipment composition:
1 FT-90 GAC-silicopoliphosphate filter,
1 FT cap,
1 bracket,
2 quick 3/8 connections.

FT-line 91
Ref: 795507
FT ultrafiltration membrane.
Suitable for use in the home, hotel and catering sector.
Equipment composition:
1 FT-91 ultrafiltration membrane,
1 FT cap,
1 bracket,
2 quick 3/8 connections.
